Welcome to the world of Mercedes-Benz
Thank you for choosing Mercedes-Benz. With ownership of a Mercedes-Benz comes our promise to support you whenever and wherever necessary.
We look forward to assisting you with our worldwide service network, our products, service and warranties for the duration of your vehicle’s service life.
Please read this Supplement and the Operator’s Manual carefully to ensure that your vehicle runs properly.

PLEASE NOTE
WE STRONGLY RECOMMEND THAT YOU HAVE YOUR VEHICLE SERVICED BY YOUR AUTHORIZED MERCEDES-BENZ DEALER WHO IS FULLY EQUIPPED TO PROVIDE THIS SERVICE AND THAT GENUINE MERCEDES-BENZ PARTS BE USED.
THE USE OF DEFECTIVE OR NON-EQUIVALENT PARTS MAY RESULT IN YOUR EMISSION PERFORMANCE WARRANTY CLAIM BEING DENIED.

Symbols
The following symbols are used in these Operating Instructions:

⚠️ WARNING
Warning notes make you aware of dangers which could pose a threat to your health or life, or to the health and life of others.

🌿 Environmental note
Environmental notes provide you with information on environmentally aware actions or disposal.

⚠️ Notes on material damage alert you to dangers that could lead to damage to your vehicle.

ℹ️ Practical tips or further information that could be helpful to you.

▷ This symbol tells you where you can find more information about a topic.

**WARNING**

If you do not have the prescribed service/maintenance work or any required repairs carried out, this can result in malfunctions or system failures. There is a risk of an accident. Always have the prescribed service/maintenance work as well as any required repairs carried out at a qualified specialist workshop. Always observe the service message in the instrument cluster display. Have the specified service carried out within the remaining time period or the remaining distance.

The Operator's Manual contains information on the ASSYST PLUS service interval display¹. The qualified specialist workshop carries out the service due at fixed intervals. These inspections take place either after a specified distance or after a certain period of time, depending on which threshold is reached first.

- The first service A is due after 12 months at the latest. Service A is then due every 24 months at the latest.
- The first service B is due after 24 months at the latest. Service B is then due every 24 months at the latest.

Additional maintenance work is taken into account depending on time and distance. Additional work includes maintenance work carried out due to technical requirements, in cases of wear or work carried out on any optional equipment which might require service. This work is carried out and invoiced separately. Depending on how the vehicle is used, the ASSYST PLUS service interval display¹ may display the next service due date earlier than is indicated in this Supplement.

You can obtain up-to-date information concerning the servicing of your vehicle at any time from a qualified workshop, e.g. a Mercedes-Benz Dealer. This could be an overview of the maintenance work or any additional maintenance work, for example.

We are continually working to improve and further develop our vehicles. Therefore, please appreciate that we must reserve the right to make modifications to the scope of servicing and maintenance.

### Special service requirements

Service and maintenance work will need to be performed more often or in addition if the vehicle is operated under arduous conditions or increased loads.

Special service requirements may be necessary, for example:

- for certain components after a breaking-in period
- after driving off-road
- after deep fording
- after vehicle underbody cleaning

You can obtain up-to-date information concerning the particular service requirements and service intervals of your vehicle at any time from a qualified specialist workshop. Mercedes-Benz recommends that you use an authorized Mercedes-Benz Center for this purpose.

¹ Depending on the vehicle’s equipment: ASSYST service interval display.
Regular checks

Check the following regularly, e.g. weekly, when refueling or prior to long journeys:

- **engine oil level**: further information on measuring the engine oil level can be found in the vehicle Operator's Manual
- **coolant level**: please refer to the Operator’s Manual to find out the correct procedure for checking the coolant level
- **brake fluid level**: if brake fluid has to be added, see an authorized Mercedes-Benz Dealer to determine the cause, e.g. leaks or worn brake pads
- **windshield washer system**: add windshield washer fluid that has been mixed with a Mercedes-Benz windshield washer solution/concentration and check the function of the system and the wiper blades
- **lighting system**
- **tire condition and tire pressure**: check these at least every two weeks. Refer to the "Tires and rims" section in the Operator’s Manual for guidelines and the correct procedure for checking the tire condition and pressure

Maintenance of the exhaust gas aftertreatment system

Gasoline engines

The U.S. Environmental Protection Agency and in California, the Air Resources Board have certified that the emission control systems of your vehicle comply with the applicable exhaust emission standards. This vehicle also complies with exhaust gas emission control standards for vehicles in Canada.

To ensure that the emission control system operates as intended, regular maintenance must be performed on all vehicle components that affect the composition of the exhaust gas and vapor emissions.

The vehicle owner is responsible for the regular maintenance of the emission control system and for using premium-grade unleaded fuel with an octane number of at least 91 (specified on the filling pump) in all models that have a gasoline engine, unless otherwise stated.

Refer to your Service and Warranty Information booklet and Operator’s Manual for additional information.

If maintenance work on the emission control system is not carried out properly, this may lead to repairs that are not covered by the emission control system warranty. Explanations of each maintenance job are given on (page 4).

Cautionary notes about the exhaust gas aftertreatment system – gasoline engine

Your vehicle is equipped with a three-way catalytic converter and a control lambda sensor in order to comply with the current exhaust gas standards. Keep your vehicle in a proper condition in accordance with the maintenance recommendations.

The following instructions must be adhered to:

**a)** In all gasoline engine models, use only premium unleaded gasoline with an octane number of at least 91 (as displayed on the pump) unless otherwise specified. Damage to the engine could occur if premium unleaded gasoline is not used. Refer to the precautions described in the Operator’s Manual.

**b)** Leaded gasoline should not be used under any circumstances. This would result in damage to the emission control system components.

**c)** In non flex-fuel capable gasoline engine equipped vehicles, ethanol blends greater than E10 should not be used. Damage to the engine could occur if improper fuels are used. Refer to the Operator’s Manual to find out about special precautions.

**d)** In select models, the use of Ethanol (E85) is also permissible. Models that can also be operated using E85 are indicated on the fuel filler cap by a sticker with the text "Premium gasoline or E85 only" . Do not use Ethanol fuel (E85) to operate any vehicle unless it is specifically identified as Ethanol fuel (E85) compatible. Damage to the engine could occur if improper fuels are used. Refer to the Operator’s Manual to find out about special precautions.

**e)** The specified engine maintenance jobs must be performed completely and at the required intervals. Properly functioning spark plugs for instance are important for the service
life of the catalysts. If the specified maintenance work is not performed correctly, this may negatively affect the vehicle’s emission control system and reduce its service life.

f) The operation of the emission control system must not be altered in any way. Alterations are not permissible by law. In addition, modifications could lead to damage to the catalytic converters, increased fuel consumption and a deterioration in the engine operating conditions.

g) Irregular engine running conditions should be corrected immediately by an authorized Mercedes-Benz Dealer. Such irregular operating conditions may affect the correct operation of the emission control system.

If the Check Engine indicator lamp lights up in the instrument cluster while the engine is running, there may be a malfunction in the engine control system or the emission control system. We recommend that you have the malfunction checked as soon as possible.

**Description of exhaust gas aftertreatment system maintenance work**

The composition of emissions is influenced by exhaust gas treatment and the various engine components and their settings. Therefore, emission system maintenance must include these engine components. Some maintenance jobs are actually only tests. They are important however, because they allow early detection of discrepancies which can later lead to increased exhaust emissions. It is generally less expensive to have such items adjusted immediately rather than allowing them to contribute to costly repairs. The maintenance intervals have been determined so that the vehicle, under normal conditions, should operate properly between services. (› page 2)

- **Replacing the engine oil and filter**
  Change the engine oil and oil filter according to the specified maintenance intervals. If oil consumption should increase, determine the cause and take necessary corrective steps. Do not reset the ASSYST PLUS service interval display² if you have added or changed the oil outside of the specified service interval.

- **Replacing the engine air cleaner**
  The engine air filter must be replaced according to the specified maintenance intervals. When operating under extremely dusty conditions, the engine air cleaner must be replaced more regularly than is displayed in the ASSYST PLUS service interval display². Clean the cover and housing of the engine air cleaner before you remove it.

- **Replacing the fuel filter**
  Replace the fuel filter according to the specified service interval.

- **Checking the condition of the poly-V-belt on the engine**
  The poly-V-belt is subject to wear and aging. It must be checked for cracks and wear according to the specified maintenance intervals. If necessary, replace the poly-V-belt.

- **Replacing the spark plugs**
  Spark plugs are subject to electrode erosion and must be replaced according to the specified maintenance intervals. If the vehicle is operated under arduous conditions, the spark plugs must be replaced more often.

² Depending on the vehicle’s equipment: ASSYST service interval display.
Service documents

In this Supplement, your Mercedes-Benz Dealer provides information on maintenance work that has been performed on your vehicle.

No other repair work that may have been performed on your vehicle is recorded or documented alongside the listed maintenance work in this Supplement. For this reason, keep evidence of this together with your vehicle's documents.

For information concerning warranty, see your Service and Warranty Information booklet.

Your Mercedes-Benz Dealer will be happy to provide you with all necessary information regarding the maintenance of your vehicle.
