

4. Scope of Services

- 4.1 The Services are intended for use by consumers or entrepreneurs (as defined in Clause 2.1) who are the registered owner of the vehicle with which the Services are to be used, or are authorized by the registered owner to use the vehicle and the Services (e.g. an employee using a company car, a vehicle lessee). Furthermore, (a) consumers must have their permanent place of residence (i.e. registration address) within the geographical boundaries of Canada; and (b) business customers must be domiciled within the geographical boundaries of Canada. The place of residence and place of business establishment will hereinafter be referred to as the "**residence**".

As Mercedes-Benz AG ("**MBAG**") is the original developer of Mercedes me connect services and makes Services available to MB Canada, the scope of Services offered by MBAG and the availability of particular services and functions to in particular markets and countries may vary. Where applicable, developments will be made available to MB Canada and its respective customers.

When the Terms of Use come into effect, the Customer will be entitled to use certain Services free of charge ("**Complimentary Services**"). Details regarding Complimentary Services can be found in the Overview of Services and on the Complimentary Services section on the customer portal ("**Customer Portal**") referred to in Clause 13.3 herein. When the Terms of Use come into effect, the Customer will be able to purchase the right to use certain other Services ("**Fee-Based Services**"). The purchase of Fee-Based Services is subject to the terms and conditions agreed to between the Customer and MB Canada, including the terms and conditions of the Mercedes me Store. These Terms of Use apply to the Customer's use of the Services, including any Fee-Based Services.

Any terms and conditions of the Customer which deviate from these Terms of Use shall not apply unless MB Canada expressly agrees to their validity in writing.

Important: The Services are offered for as long as the Customer's vehicle's technology is supported; MB Canada reserves the right to change or discontinue Services at any time without incurring any future obligation. For information about available services, see the Overview of Services .

- 4.2 Subject to Clause 4.10 herein, the Services offered by MB Canada are generally available in Canada, however full service availability as

defined in the current Overview of Services is only guaranteed in Canada for Canadian customers. If certain Services are geographically limited or not available during certain times, this is identified in the Service Descriptions. Insofar as the vehicle is used in a country other than the country of residence (e.g. cross-border vehicle use) or the vehicle is imported from a country other than the country of residence, the Services may be impaired or not function at all due to country-specific technical equipment of the vehicle (e.g. communication module) or the country-specific availability of third-party providers that provide or host third-party content, products or services relating to the Services, such as streaming service providers (collectively, "**Third-Party Providers**").

- 4.3 MB Canada makes available to the Customer for the Services a Customer Portal and other User Gateways on which the Customer may set up a user account by which he or she can manage the Services online ("**User Account**"). The scope of the individual Services, conditions of use, availability and, where applicable, further information are set out in the respective Service Description in the Customer Portal. The availability and scope of Services may vary depending on the vehicle type and equipment. The Provider (as the term is defined in section 4.10) reserves the right to further develop the Services at any time and to add, change or remove individual functions. Any modification shall only be made if there is a valid reason and the Customer does not incur any additional costs. The following circumstances may lead to a modification of the services: modification to a new technical environment, modification to an increased number of users, modification due to important operational reasons, further development of the services, modification due to new legal requirements and rulings of the courts or other equivalent reasons. The Provider shall inform the Customer about upcoming changes and the possible legal consequences. The Provider also reserves the right to deactivate the services at its discretion, for reasons including but not limited to data security or when technology is no longer supported.

- 4.4 A Customer is free to connect and manage several vehicles (up to a maximum of 20 for Customers who are a consumer and an unlimited number of vehicles where the Customer is an entrepreneur) that may use the Services using their User Account and may also disconnect the vehicles from the Services at any time. Business customers can also create additional vehicles if they are authorised and activated accordingly by a service partner. Services are specific to the vehicle for which

- they are offered and cannot be transferred to other vehicles; Fee-Based Services must be purchased separately for each vehicle. Clauses 5.2 and 5.3 herein apply to the connection and disconnection of vehicles.
- 4.5 Services that require a linked vehicle (see section 5.2) apply exclusively to the respective vehicle (e.g. charging services, streaming services, "**convenience data volume**" service) and are not transferable to other vehicles. Furthermore, all Services may only be used for the purpose specified in the Service Description.
- 4.6 The Customer may operate and use the Services *via* the User Gateways described in the paragraphs below (collectively "**User Gateways**"). The scope of Services available *via* the relevant User Gateway is set forth in the Overview of Services. Prior to using the Services *via* the relevant User Gateway, the Customer must create a User Account, unless the Terms of Use provide otherwise.
- The Customer may operate and use a number of Services *via* the infotainment system in the vehicle. The Customer may also operate and use certain Services *via* the Customer Portal. Some Services can be operated and used only *via* the Customer Portal.
- Furthermore, the Customer has the option of operating and using certain Services in certain Target Countries *via* a Mercedes-Benz software application installed on a compatible end-user device ("**App**").
- However, individual Services may be limited when used *via* the App. Additional Services may be available to the Customer that can be operated and used only *via* the App. The Customer may obtain more information, for example regarding the Target Countries for the App and how to acquire it, on the Customer Portal or from authorised dealers that distribute the Services (both "**Service Partners**").
- We reserve the right to make changes to the User Gateway insofar as the change is reasonable for the Customer.
- 4.7 The Customer may delete the App at any time. Once the App is deleted, the Customer will no longer have any access to the Services *via* the App. In addition, changes made to the compatible end-user device (e.g., update of the operating system, jailbreaking the end-user device) could render the App unusable.
- Important: Unless otherwise prohibited by applicable law, any obligations to MB Canada to pay the fees for the Fee-Based Services shall survive indefinitely and will be unaffected by a deletion of the App or by changes to the compatible end-user device which render the App no longer useable.**
- 4.8 The Customer will have the opportunity to activate or deactivate individual Services. If a Service has been activated, the Customer can use that Service. If a Service is deactivated, then that Service will not be available to the Customer during the period that Service is deactivated. New Services will only become active when they are activated by the Customer.
- Important: Unless otherwise prohibited by applicable law, any obligations to MB Canada to pay the fees for the Fee-Based Services or contractual agreements with Third-Party Providers shall survive indefinitely and will be unaffected by a deactivation of the Services.**
- 4.9 Termination of Services, User Account, or Co-User Account.
- MB Canada shall be entitled to deactivate or limit the Services, or to terminate a User Account or Co-User Account, in MB Canada's sole discretion, for any of the following reasons:
- (i) If the Customer fails to pay any necessary fees, revokes the purchase of any Fee-Based Service, or otherwise violates the terms under which a Service is provided;
 - (ii) if Customer or any Co-User uses the Services in a way that could reasonably be considered, without limitation, to be offensive, abusive, stalking, threatening, demeaning, unlawful, false, misleading, promotes, advocates or otherwise encourages illegal activities including activities that would constitute a criminal offense or give rise to civil liability, or otherwise violate the legal rights of others; and
 - (iii) for security or safety reasons (e.g., data security, security problems at Content Providers/Third Party Providers).
- Except as required by law, should a deactivation, limitation or termination of any Fee-Based Services occur pursuant to subsections (i) or (ii) above, Customer shall not be entitled to a refund of any amounts paid. Where a refund is required by law, or where a deactivation, limitation or termination occurs pursuant to (iii) above, it shall be pro-rated.
- 4.10 While MB Canada makes reasonable efforts to ensure the Services are available and accurate, the provision and use of the Services may be subject to certain limitations, service interruptions and inaccuracies beyond the control of MB Canada. In individual cases there may be discrepancies between the vehicle operating data displayed in the vehicle (e.g. in the infotainment system) and that in the Customer's respective User Gateway. This applies, for example to the availability of the mobile data connection provided by telecommunications companies, the mobile

network, the number of users on the mobile network, the global navigation satellite system (GPS) geolocation services and internet access. As a result, the Services are geographically limited to the transmission and reception areas of the transmission stations operated by the relevant telecommunications companies. The unavailability of the mobile network can in some cases mean that individual Services are unavailable because the necessary data transfer cannot take place. The Services may also be adversely impacted by atmospheric conditions and topographical features or obstacles (e.g., bridges, tunnels, buildings). The same applies to geolocation based on global navigation satellite systems. Other disruptions, such as network overload, may hamper use of the internet. Moreover, sudden capacity bottlenecks may arise from spikes in the use of the Services, the mobile and landline networks or the internet.

The mobile communications connection between the vehicle and the service provider and/or cloud provider ("**Backend**") may be disrupted for similar reasons, with similar effects.

Disruptions may also be caused by force majeure events, including strikes, lockouts or administrative orders, or result from technical or other measures (e.g., repairs, maintenance, software updates, enhancements) which need to be carried out on MB Canada systems or on those of upstream or downstream service providers ("**Third Party Service Provider**"), Third Party Content Providers ("**Third Party Content Provider**") or network operators which are necessary in order to ensure that the Services are properly provided or updated.

The use of the Services via the App may also be subject to limitations and inaccuracies because of the unavailability of, disruptions to or faults in the App, or the compatible end-user device (e.g., for reasons of force majeure or technical and other measures such as maintenance, software updates, enhancements to the App).

- 4.11 While the vehicle is in the workshop receiving maintenance or repair services, the Services may be temporarily unavailable or only available to a limited extent. This is to prevent disruption or interference with the maintenance and repair work, as well as avoid the generation of data that could result in erroneous status and diagnostic reports. If this occurs, the Customer may receive erroneous offers for maintenance services or an erroneous request to arrange an appointment from the Service Partner due to the mistaken identification of a need for repairs. Following the workshop visit, it may be necessary for the Customer to activate the Services again.

- 4.12 The Services require a fully functioning power supply within the vehicle from the vehicle battery. If the Services are used excessively and the vehicle's battery is not intermittently charged by running the engine, or connecting the battery to a power supply (in the case of electric vehicles), then this may result in the battery becoming depleted and the Services being affected. If the vehicle is left standing for a considerable period, then the communication module in the vehicle might switch itself off, thus cancelling the mobile data connection to the vehicle until the vehicle is next operated manually.

- 4.13 **Important: The display in the instrument cluster of the vehicle takes precedence over all other information channels, for example, the display via the Customer's User Gateways. The information displayed in the infotainment system or in the App is not definitive and may in full or in part be incomplete or incorrect, not up to date, or unavailable; any information displayed may be current only as of the time it is queried. More extensive instructions or discrepancies arise from the Special Part of the Terms of Use. MB Canada, its respective affiliates, distributors, dealers, dealer associations, together with their respective employees, agents, directors, officers and shareholders (collectively, "MB Parties") assume no responsibility regarding whether the information is complete, accurate, current or otherwise available to the Customer.**

- 4.14 Once the Terms of Use come into effect and the vehicle is connected, a mobile data connection is used to download and automatically install software updates for the browser and vehicle components (e.g. infotainment system or Communication Module) without the need to visit a workshop ("Software Update"). The Software Updates can be initiated from the vehicle or from the Backend and can improve and enhance functions of the vehicle and the Services and may make available or facilitate new functions of the vehicle and the Services, or modify or remove functions of the vehicle and the Services. The Software Updates cannot be deactivated by the Customer. The period of time between the individual Software Updates can vary and will be at the sole discretion of MBAG. There is no right to demand Software Updates beyond what is required to fulfil the contract, or security updates, provided any such Software Update is available.

The Software Updates are subject to the availability and limitations of the mobile network and of the equipment in the vehicle. That means that the time it takes to download and install any software will be different from

vehicle to vehicle and can take anywhere from a few minutes to several hours. The status will be stored in the Backend and shown to the Customer via such Customer's User Gateways. In some circumstances, the Software Updates may be required for the unimpeded performance and operation of the Services. The Customer is not entitled to obtain the Software Updates by other means (e.g., through the Service Partners). During service visits to Mercedes-Benz Service partners entrusted with providing maintenance and repair services for Mercedes-Benz vehicles additional measures may be performed as an alternative or in addition to the Software Updates.

While the Software Updates are downloading and installing, the functionality of the vehicle or individual components (e.g., the infotainment system or Communication Module) may be restricted for a certain period of time. In the unlikely event that a fatal technical error occurs during the installation of the Software Update, the functionality may continue to be restricted and a workshop repair may be needed.

4.15 Intentionally deleted

4.16 Intentionally deleted

4.17 For certain Services (e.g. Internet radio, filling station prices, Live Traffic, Car-to-X Communication) the information generated by Third Party Content Providers may be, either in whole or in part, incomplete, incorrect, not current or not available. The information is also generated in the individual Target Countries by various Third Party Content Providers and as a result, the information may be of different quality in different Target Countries. The MB Parties assume no responsibility for checking whether the information is complete, accurate or current, or for completing, correcting or updating such information, or for making sure that the information is available or is made available in a certain quality, nor do the MB Parties assume any liability for the Customer's use of the Services. The Customer is independently responsible for Customer's use of the information and any decisions made on the basis of the information; accordingly, the Customer is responsible for checking whether the information is complete, accurate or current and is available or is made available in a quality suitable for the Customer's particular purposes.

4.18 The MB Parties assume no obligation or liability with respect to the accuracy of the vehicle operating data displayed in either the vehicle or the User Gateway. The MB Parties assume no obligation or liability for any matters relating to a disruption in service resulting from (i) a disruption in mobile data connections provided by mobile phone companies, any mobile networks, global navigation satellite system

GPS location services, or internet access; (ii) a depletion in vehicle battery or shut-down of the Communication Module; (iii) or any force majeure event or other technical issue outside of the MB Parties' direct control, including any issue related to services provided by any third party. The disclaimers in this section are in addition to any disclaimers for specific Services or features as set forth in the "Other Notices" section of these Terms of Use.

5. Requirements for Use

5.1 The Services are available in vehicles from Mercedes-Benz series that are fitted with an integrated Communication Module. Some Services require additional and/or optional equipment in the vehicle. Additional information and details of other requirements for use are set forth in the respective Service Description.

For certain functions and Services, the vehicle requires a mobile data connection between the vehicle and the Backend as well as the compatible end-user device of the Customer. In addition, the vehicle must have an infotainment system. Additional conditions for use or exceptions are described in the Special Part of the Terms of Use.

5.2 In order to be able to use the Services for a vehicle, the vehicle must be connected to a valid User Account. The vehicle can be connected at Service Partners or, for certain Services, online via the User Account. The Customer may obtain more information on the Customer Portal or from Service Partners.

Services in the vehicle cannot be activated and used until the vehicle is connected. Once connected, each vehicle can only have one Customer registered as the main user; however, in the case of business customers it is possible to set up several main users per vehicle. Additional users may be added, but must be registered as "**Co-Users**" within the meaning of Clause 10.1 herein.

5.3 The vehicle is disconnected when the Customer either removes the vehicle from the User Account or requests the disconnection from a Service Partner or the Mercedes-Benz Customer Assistance Centre identified in Clause 13.2 herein.

The disconnection will deactivate the Services in the relevant vehicle for the Customer. Deactivation of the Services does not deactivate the SIM card in the vehicle.

Important: Unless otherwise prohibited by applicable law, any obligation of the Customer to pay the fees to MB Canada for the Fee-Based Services shall survive indefinitely and remain unaffected by the disconnection.

For security reasons, an identity check is required for the use of some Services. This can be done with an identification document on site at a Service Partner or online via the App. The Customer will be informed of the necessity of the identity check when activating all Services or the corresponding Service. The Service can only be used by the Customer after a positive identity check. The Provider reserves the right to repeat the identity check at a later date.

- 5.4 **Biometric Data.** Where you choose to enable certain features that use biometric information for additional security purposes such as fingerprint, voice or facial recognition, (collectively, "**Biometric Data**") you are consenting to i) use your Biometric Data for the purpose of confirming your identity and right to access to certain Services for the purpose of preventing unauthorized access to the Services, and ii) to the storage of your Biometric Data by the vehicle. You may delete your Biometric Data at any time within the vehicle's user profile settings.
- 5.5 For the use of the Services, which utilize services of Third-Party Providers, the Customer shall enter a separate agreement with the respective Third-Party Provider under the terms and conditions of the respective Third-Party Provider. The Customer may be required to set up a personal user account ("**Third-Party Provider Account**"). Furthermore, for certain services, the Customer may be required to enter an additional agreement with a mobile communications provider independent from the Provider. The Provider assumes no liability for the services of the Third-Party Providers and mobile communications provider.
- 5.6 Continued use of the Services via the App also requires regular updates of the App when such updates are available.
- 5.7 The data for some Fee-Based Services and functions for Mercedes me connect and smart control are based on technical applications and data from Third-Party Provider(s). The (license) terms of the Third-Party Provider(s) can be found at:
<https://legal.here.com/ca-en/terms/here-end-user-terms>
<https://legal.connectedrad.io/tandc/daimler>
<https://opendatacommons.org/licenses/odbl/1-0/> ([OpenStreetMap database](https://www.openstreetmap.org/))
https://maps.google.com/help/terms_maps.html (Google Maps)
<https://www.google.com/policies/privacy/> (Google Maps).
- 5.8 For Customers having a vehicle with optional equipment for highly automated driving functions ("**System**"), Services must be activated and available in order to use the

System. Despite activation of these Services, it is possible that the System will not be available or will only be available to a limited extent. The availability and activation of the System depend on additional System requirements and System limitations and are subject to functional, spatial, regional and temporal limitations. The availability of the System may also depend, among other things, on suitable weather conditions, the currently available route network, an existing route clearance and/or the respective traffic situation. The availability of the System can also be limited for security reasons. The availability of the System also depends on the currently valid laws of the country in which the vehicle is used. Further information on System requirements and System limits as well as on data processing in vehicles with highly automated driving functions can be found in the operating instructions.

6. Payment Function in the Context of Services

- 6.1 The payment function enables the Customer to pay certain Services after entering into a payment contract.
- 6.2 When using the payment function, the respective Third-Party Provider or its sales partner becomes the contracting party ("**Seller**") of the Customer; MB Canada merely mediates the conclusion of the contract and does not itself become a contracting party. With regard to the contract, the respective general terms and conditions of the Seller shall apply.
- 6.3 With respect to payment, MB Canada acts only as a technical service provider and shall only provide the technical platform for the payment; MB Canada may also use other service providers for this purpose. The authorization of a payment, the access to a payment account of the Customer, as well as the transfer of the amount from the payment account of the Customer to the Seller is carried out exclusively by payment service providers commissioned by the respective seller (e.g. payment service provider or acquirer) (hereinafter referred to as "**Payment Processor**"). During a payment transaction, MB Canada does not gain possession of the funds to be transferred at any time.
- 6.4 The prices listed by the respective Seller are those in effect at the time the parties agree to payment, and become due immediately upon the agreement being fulfilled. Once the transaction is concluded, the price paid will be displayed in the corresponding User Gateway, if applicable. The Customer must promptly notify MB Canada of any discrepancies between the price displayed in the respective

User Gateway and the information of the Seller (e.g. by email to: mercedes_me_connect@cac.mercedes-benz.com).

- 6.5 Use of the payment function is possible only if the complete and required payment and customer data are provided and a valid means of payment is posted in the User Account.
- 6.6 When using the payment function, some sellers require that the transaction must first be pre-authorised by the payment processor in consideration of a maximum amount set by the Customer. If the transaction is not pre-authorised by the Payment Processor, the Seller reserves the right to decline the transaction.
- 6.7 On receipt of the Customer's payment confirmation via the payment function, the Provider will forward the information required for the payment of the price to one or more Payment Processors and/or the Seller. The Provider may also use other service providers for the transmission of the required information to one or more payment processors or a seller. The purchase price is debited exclusively by a Payment Processor from the means of payment posted in the User Account and is then transferred to an account of the Seller. A completed payment of the price to the Seller will be displayed as such in the corresponding User Account; in addition, the Seller will be informed about the payment made. The Customer will receive the respective receipt of the Seller for the price paid via the notification option set in the User Account.
- 6.8 Any multiple payments for the same Service will be determined by the Payment Processor and an automatic reversal will be initiated. This reversal will be processed via the means of payment that has been posted in the User Account by the Customer.
- 6.9 Only the Seller is responsible for any claims that arise from or in connection with the contract. MB Canada does not become a contracting party to the agreement to pay and is therefore not obliged to provide a warranty or to accept any other liability under such agreement.

7. Fees and Costs

- 7.1 The Complimentary Services are free of charge to the Customer, however fees apply to Fee-Based Services. In some cases, optional equipment in the vehicle is also necessary to use the Services and could result in a higher vehicle price. Details about the necessary optional equipment is available in the Service Description.

The App is made available to the Customer free of charge.

- 7.2 Any costs for the mobile data connection between the vehicle and the Backend will generally be borne by MB Canada.
- 7.3 Any costs for the mobile data connection that are incurred when the Customer is using his or her compatible end-user device or other media and telecommunications equipment to access the Customer Portal or the Customer User Account outside the vehicle shall be borne by the Customer in accordance with the rates charged by the mobile service provider used by the Customer. These costs are based on the rates charged by the mobile service provider used by the Customer; higher fees may arise in other countries.
- 7.4 Any costs for the use of services from Third-Party Providers shall be borne by the Customer.

8. Obligations of the Customer

- 8.1 The Customer warrants that he or she is either the registered owner of the vehicle or that the vehicle's registered owner has permitted him/her to use the vehicle and thus also to use the Services in the vehicle.
- 8.2 The Customer warrants that his or her profile data, specifically name, address (and email address if the Customer has a User Account), phone number and date of birth, reported to the Service Partner or entered into the User Account, is correct. The Customer shall inform MB Canada of any changes to this data without undue delay. The same applies to all other data, which has been posted voluntarily. For Customers with a vehicle from 'Vehicle Type 3' category, a profile is automatically created with the vehicle link and protected with a PIN.

If the Customer's profile data is incorrect and communication with the Customer is therefore not possible, then MB Canada reserves the right to terminate the Services and shall not be liable to the Customer for any issue relating to or arising from such termination of the Services.

Important: Unless otherwise prohibited by applicable law, any obligations owed to MB Canada to pay the fees for the Fee-Based Services shall survive indefinitely and remain unaffected by the termination of the Services due to the inability to communicate with the Customer.

- 8.3 The Customer shall without undue delay disconnect the vehicle from the Services in accordance with Clause 5.3 herein if the Customer no longer owns or is otherwise lawfully not entitled to use the vehicle (e.g., because it is sold or the authorisation to use a company car or leased car is cancelled) or if the vehicle is destroyed.

If the Customer fails to fulfil their obligation to disconnect the vehicle and another person accesses the Services in accordance with Clause 5.2 herein, or if the registered owner of the vehicle notifies MB Canada that the Customer is no longer authorised to use the vehicle, then MB Canada may disconnect the vehicle in accordance with Clause 5.3 herein without further notice to the Customer and will then take reasonable steps to inform the Customer that the disconnection has taken place. The liability of the Customer under Clause 8.8 herein remains unaffected.

- 8.4 The Customer is responsible for maintaining the confidentiality of the password and account and other account or service codes issued or used, and is fully responsible for all activities that occur under the Customer's password or account. The Customer agrees not to use the account or password of another registered user without permission or to disclose the password to any unauthorised third party. In particular, the Customer shall not use the same combination of email address and password for accessing the User Account that the Customer uses for other online services. The Customer is also responsible for all activities and usage of any Co-User, as defined Clause 10.1 herein.
- 8.5 The Customer will be entitled to use the Services only if the Customer complies with the Terms of Use and applicable law.
- 8.6 If the Customer becomes aware or reasonably suspects that the Services have been used in violation of the Terms of Use, by the unauthorized use of a password or account or any other breach of security, or that an unauthorized third party has accessed or used the mobile network provided for the Services, or there has been unauthorized use of a password or account or other breach of security, then the Customer must inform MB Canada of this without undue delay via the User Account or by contacting the CAC using one of the methods described in Clause 13.2 herein.
- 8.7 The Customer will not: (i) modify, edit, decompile (including by means of reverse engineering), store or otherwise copy the software applications provided for the use of the Services; or (ii) remove, circumvent, disable, damage or otherwise interfere with security-related features of any the software applications provided for the use of the Services, or features that enforce limitations on use of the software applications provided for the use of the Services. The software applications provided for the use of the Services shall be used solely for the use of the Services as provided hereunder.
- 8.8 The Customer shall be liable to MB Canada, MBAG and their affiliated companies and their respective agents, representatives and Third

Party Service Providers, and their employees for any loss or damage arising from Customer's or Co-User's breach of the obligations under the Terms of Use in accordance with the statutory provisions.

- 8.9 In the event that a Customer is liable in accordance with Clause 8.8 herein, the Customer shall indemnify, defend and hold harmless MB Canada, MBAG and their affiliated companies and their respective agents, representatives and Third Party Service Providers, and their employees for all claims, costs, damage and losses (including the costs of reasonable legal proceedings) arising from a third-party claim against MBAG or MB Canada based on the Customer's use of the Services (even where such use is permitted), and the violation of applicable laws, third-party rights, or the Terms of Use.
- 8.10 The Customer is personally responsible for saving any data on the Customer's compatible end-user devices and MB Canada shall not be liable to Customer for any loss of data arising from or relating to the use of the Services.
- 8.11 If the Customer provides or allows the vehicle to be used by another vehicle user, the Customer shall (i) inform the other vehicle user about the Services and associated data collection, processing, storage and use of data prior to the start of the journey, and shall also inform them of the possibility to deactivate individual services; and (ii) deregister or log-out from their own connected Third-Party Provider account or deactivate the Services where applicable, in order, for example, to prevent any misuse by the other vehicle user. Prior to the journey, the Customer must check whether the Services and function needed by the other vehicle user are activated.

9. Term and Termination

- 9.1 The term will continue until terminated as permitted under these Terms of Use.

The term of the Services is set forth in the respective Service Description or the agreement between the Customer and MB Canada.

Important: Notwithstanding the foregoing, MB Canada reserves the right to change or discontinue Mercedes me connect services at any time without incurring any future obligation. For example, technologies can and do change over time so current technologies used by Mercedes me connect may become obsolete or be replaced by other, different technologies, including different cellular or wi-fi signals, which may render Mercedes me connect inoperable with the Customer's vehicle. MB Canada will not be responsible for purchasing any hardware or software for

the Customer's vehicle and/or cellular device, or updating them with new technologies that might in the future be required to restore operation of Mercedes me connect with the Customer's vehicle.

- 9.2 MB Canada may terminate the Terms of Use or any individual Fee-Based Service at any time by giving thirty days' written notice, but no earlier than upon expiration of the last fully paid up Fee-Based Service purchased by the Customer. If the Customer has obtained only the Complimentary Services, MB Canada may terminate these Services at any time and will give notice of termination in text form (including by email, text message, and a message in the Mercedes me mailbox.)

- 9.3 The Customer may terminate the Terms of Use or individual Services at any time. The Customer must give notice of such termination via the Customer's User Account, by deleting his or her User Account, or in written form to the CAC.

Important: Unless otherwise prohibited by applicable law, any obligations owed to MB Canada to pay the fees for the Fee-Based Services shall survive indefinitely and remain unaffected by the Customer's termination of the Master Agreement and individual Services, respectively.

Important: The deletion of the App in accordance with Clause 4.7 herein and the deactivation of Services in accordance with Clause 4.8 herein does not constitute termination. Instead, notice of termination must be given via the Customer's User Account or in written form to the CAC.

- 9.4 If the Customer, having previously resided in one of the Target Countries, changes their residence to a country which is not one of the Target Countries, the Services shall be automatically terminated and deactivated without notice.

If the Customer uses the Services via the App and, having previously resided in one of the Target Countries for the App, changes their residence to a country which is not one of the Target Countries for the App, the Customer may no longer use the Services via the App.

Important: Unless otherwise prohibited by applicable law, any obligations owed to MB Canada to pay the fees for Fee-Based Services shall survive indefinitely and remain unaffected by the change in the residence.

- 9.5 The right to terminate the Terms of Use or individual Services for cause remains unaffected. Cause includes a breach of these Terms of Use and misuse of the Services. MB Canada will give the notice of termination for cause in written form (including email, text and

message in the Mercedes me mailbox), and the Customer shall do so via the Customer's User Account or in written form to the CAC.

Important: Any obligations owed to MB Canada to pay the fees for the Fee-Based Services shall survive indefinitely and remain unaffected by MB Canada's termination of the Terms of Use and individual Services, respectively, for cause.

- 9.6 In the event the Terms of Use or individual Services are terminated, the relevant Services will be deactivated in the impacted vehicles. However, the Customer's User Account will remain active until such time as it is deleted by the User.

- 9.7 MB Canada may at any time transfer or assign to a third party and/or to the local MB AG group company domiciled in the Target Countries its rights, duties or both under this agreement ("**Contract Transfer**"). MB Canada will provide to the Customer written notice (including email, text, and message in the Mercedes me mailbox) of such Contract Transfer one month prior to such Contract Transfer occurring. The Customer may immediately terminate this agreement at any time in the one month period following MB Canada having provided notice of the Contract Transfer. Notice of termination by the Customer must be given via the Customer's User Account or in written form (including email) to the CAC.

10. Other Users and Co-user Authorisation

- 10.1 In order to enable other persons to access Services, the Customer may authorise other persons as co-users ("**Co-Users**") in the Customer's User Account. To use the Services as Co-Users, these other persons must also create a User Account and confirm online that the Customer has authorised them.

To use the Services as a Co-User via the App, these persons must also purchase the App and install it on a compatible end-user device.

- 10.2 Co-Users can view, operate and use certain Services in the same way as the Customer (e.g., they can inquire as to the vehicle's status). However, only the Customer is able to obtain Services, terminate the Services, activate and deactivate the Services and connect and disconnect the vehicle. The scope of the Services available for the Co-User can vary.

When functions are being programmed, the command most recently received in the car is always the applicable command, regardless of whether it came from the Customer or the co-user. However, Co-Users cannot activate or deactivate the Services.

- 10.3 The Customer may revoke the authorization of a Co-User at any time via the User Account.

11. Liability

11.1 DISCLAIMER. THE SERVICES AND ALL THE INFORMATION ACCESSIBLE THROUGH SUCH SERVICES ARE PROVIDED FOR INFORMATION PURPOSES ONLY ON AN "AS IS" AND "AS AVAILABLE" BASIS. THE MB PARTIES MAKE NO WARRANTIES, REPRESENTATIONS, OR GUARANTEES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO, ACCURACY, CURRENCY, OR COMPLETENESS OF THE INFORMATION RESULTING FROM THE SERVICES OR THE OPERATION OF THE SERVICES. TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, THE MB PARTIES DISCLAIM ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. FURTHER, THE MB PARTIES ASSUMES NO LIABILITY OR RESPONSIBILITY FOR ANY (I) ERRORS, MISTAKES, OR INACCURACIES OF CONTENT, (II) PERSONAL INJURY OR PROPERTY DAMAGE, OF ANY NATURE WHATSOEVER, RESULTING FROM THE CUSTOMER'S ACCESS TO AND USE OF THE SERVICES, (III) ANY UNAUTHORIZED ACCESS TO OR USE OF THE MB PARTIES' SECURE SERVERS AND/OR ANY AND ALL PERSONAL INFORMATION AND/OR FINANCIAL INFORMATION STORED THEREIN, (IV) ANY INTERRUPTION OR CESSATION OF TRANSMISSION TO OR FROM THE SERVICES, (V) ANY BUGS, VIRUSES, TROJAN HORSES, OR THE LIKE WHICH MAY BE TRANSMITTED TO OR THROUGH THE SERVICES BY ANY THIRD-PARTY, AND/OR (VI) ANY ERRORS OR OMISSIONS IN ANY CONTENT OR FOR ANY LOSS OR DAMAGE OF ANY KIND INCURRED AS A RESULT OF THE USE OF ANY CONTENT POSTED, EMAILED, TRANSMITTED, OR OTHERWISE MADE AVAILABLE VIA THE SERVICES.

CUSTOMER ACKNOWLEDGES THAT CUSTOMER BEARS THE SOLE RISK OF TRANSMITTING THROUGH THE SERVICES ANY CONTENT, INCLUDING INFORMATION WHICH IDENTIFIES CUSTOMER OR CUSTOMER'S LOCATION. MB CANADA'S THIRD PARTY SERVICE PROVIDERS DO NOT MAKE ANY WARRANTIES TO CUSTOMER UNDER THE TERMS OF USE AND MB CANADA DOES NOT MAKE ANY WARRANTIES ON BEHALF OF SUCH THIRD PARTY SERVICE PROVIDERS UNDER THE TERMS OF USE.

11.2 THE MB PARTIES WILL NOT BE LIABLE TO THE CUSTOMER OR ANY OTHER PARTY FOR CONSEQUENTIAL, INDIRECT, INCIDENTAL, SPECIAL, OR PUNITIVE DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS OR LOST INFORMATION/DATA) IN CONNECTION WITH

THE SERVICES, EVEN IF THE MB PARTIES ARE AWARE OF THE POSSIBILITY OF SUCH DAMAGES. THESE LIMITATIONS APPLY TO ALL CLAIMS, INCLUDING, WITHOUT LIMITATION, CLAIMS IN CONTRACT AND TORT (SUCH AS NEGLIGENCE, PRODUCT LIABILITY AND STRICT LIABILITY). TO THE EXTENT THAT A JURISDICTION DOES NOT PERMIT THE EXCLUSION OR LIMITATION OF LIABILITY AS SET FORTH HEREIN, LIABILITY IS LIMITED TO THE MAXIMUM EXTENT PERMITTED BY LAW IN SUCH JURISDICTION.

The Customer acknowledges that the Customer will be fully liable for all damages resulting directly or indirectly from the use of the Services by or through Customer, including any Co-Users. All claims under these Terms of Use must be brought by the Customer, and Customer hereby agrees to indemnify defend and hold the MB Parties harmless against any claims, demands or allegations initiated by any Co-Users.

Insofar as damage is or could be covered by an insurance policy taken out by the Customer, the MB Parties shall not be liable for any such damages suffered by the Customer and Customer waives any and all such claims and damages against the MB Parties and waives rights of subrogation, including on behalf of the insurance carrier.

11.3 These limitations of liability apply not only to the Customer, but to anyone using the Customer's vehicle (including passengers), to anyone attempting to make a claim on the Customer's behalf, and to any claims made by the Customer's family, employees, customers, or others arising out of or relating to the Services. The limitations of liability set forth in this section do not apply in the event of death or personal injury to the extent arising out of the MB Parties' negligence in the performance of their obligations hereunder, or from claims arising from the MB Parties' gross negligence or intentional misconduct.

12. Personal Information Protection and Data Security

12.1 MB Canada takes the protection of users' personal information seriously and takes care to protect the privacy of the users during the collection, use and disclosure of such personal information.

12.2 Further details concerning the data processing, privacy and data security are provided in the Connected Vehicle Privacy Notice for the Mercedes me connect Services which is available here:

<https://www.mercedes-benz.ca/en/legal-notice/privacy-policy>

The Terms and Conditions incorporate the Connected Vehicle Privacy Notice for the Mercedes me connect Services.

- 12.3 In the relationship between the business customer and MB Canada the provisions of the contract data processing agreement shall apply (with the exception of the Van Uptime Service). If the Customer is an entrepreneur and uses Services in the exercise of his commercial or independent business activity and provides the vehicle for use by another vehicle user, the entrepreneur may be able to obtain access to personal data of the respective vehicle user via the Services. In this case, the entrepreneur is the data controller for the processing of personal data of the relevant vehicle users. As data controller, the Customer or entrepreneur is obliged to protect the legal rights of the relevant vehicle users (including as set out in Clause 8.11).

13. Final Provisions

- 13.1 Each party irrevocably consents and agrees that any legal action, suit or proceeding against either of them arising out of, relating to or in connection with this Agreement or disputes relating hereto (whether for breach of contract, tortious conduct or otherwise) shall be brought only in the Courts of the Province of Ontario, and hereby irrevocably accepts and submits to the exclusive jurisdiction of the aforesaid courts with respect to any such action, suit or proceeding.
- 13.2 This Agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein, without giving effect to its conflicts of law principles.
- 13.3 If any provision of the Terms of Use is deemed unlawful or unenforceable by a court of competent jurisdiction, then the impugned provision shall be deemed severed and shall not affect the validity and enforceability of any remaining provisions.
- 13.4 These Terms of Use, and all other attachments and exhibits, set forth the entire agreement between the parties with respect to the subject matter hereof and supersedes all previous written or oral agreements or representations between the parties with respect to such subject matter.
- 13.5 No waiver of any breach or default under the Terms of Use shall be deemed to be a waiver of any preceding or subsequent breach or default. To be legally binding on MB Canada, any waiver must be in writing.
- 13.6 Customer may not assign these Terms of Use, in whole or in part, without the prior written consent of MB Canada, and any assignment in violation of this Clause shall be null and void.

- 13.7 The terms and conditions contained in the Terms of Use that by their nature are intended to survive the termination of the Terms of Use shall survive the completion of performance and termination of the Terms of Use, including without limitation, Clauses 7-13, and the making of any and all payments pursuant to the Terms of Use.

- 13.8 The Terms of Use may be executed in counterparts, each of which shall be deemed an original and all of which together shall constitute one and the same instrument.

14. Contact Details

*Free of charge from landline, mobile phone charges may differ

Customer Portal: <https://www.me.mercedes-benz.ca>

II. Special Part

The following Special Part applies to specific Mercedes me connect Services. Such Services may not be available to all Customers:

1. **Maintenance Management**

This Service enables the Customer to receive individual non-binding offers from Service Partners, selected by the Customer in advance, in the event of a detected need for maintenance in the vehicle.

2. **Telediagnosics**

This Service allows MB Canada to collect and records information about certain types of vehicle wear and tear and certain component outages. However, only some components are suitable for diagnostics-based monitoring, and

information about outages of such components will only be generated where such diagnostic reports are unambiguous. Relevant data is received by MB Canada and MB Canada reports this information to the Service Partner pre-selected by the Customer in order to allow the Service Partner to contact the Customer and the Customer to inform the Service Partner of a preferred appointment date.

2.1 **Telediagnosics Display Message**

This function allows MB Canada to collect and record information about certain types of vehicle wear and tear and certain component outages. However, only some components are suitable for diagnostics-based monitoring, and information about outages of such components will only be generated where such diagnostic reports are unambiguous. Relevant data is automatically transmitted to the Backend and via the vehicle infotainment system, the Customer receives a popup message through which the Customer can enter into direct contact with the CAC if desired.

3. **Accident Recovery and Breakdown Management**

This Service allows the Customer to establish a telecommunications connection with the CAC from the vehicle and to obtain specific support following an accident or breakdown. It can also be used to obtain answers to questions about the vehicle operation, the nearest Mercedes-Benz Service Partner or other products and services of Mercedes-Benz in an informational call.

4. **Accident Recovery**

This Service allows the occupants of a vehicle registered for the Assist Services to establish a telecommunications connection with a CAC following a Mercedes-Benz emergency call and have transferred to the CAC the vehicle's location data, together with all necessary and appropriate vehicle data that has been compiled in accordance with the technical design, in order to obtain targeted assistance.

5. **Breakdown Management**

In some cases, the vehicle can also detect possible accidents based on technical data it receives from sensors in the vehicle. The Breakdown Management Service allows the occupants of a vehicle registered for the Assist Services to establish a telecommunications connection with a CAC in the event a breakdown is detected, and transfer to the CAC the vehicle's location data, together with all necessary and appropriate vehicle data that has been compiled in accordance with the

technical design, in order to obtain targeted assistance.

6. **Remote Vehicle Diagnostics**

This Service allows the Service Partner pre-selected by the Customer or an authorised Mercedes-Benz workshop engaged by the Customer for repair, maintenance or technical enquiries, MB Canada technical market support and the CAC to retrieve information about the technical condition of the vehicle. Such information is in the form of diagnostics data, and it is retrieved before a scheduled auto repair shop visit, or during such visit, in order to assist with troubleshooting. In the event of a breakdown, the CAC can, using this diagnostics data, inform an employee of the Service Partner or a mechanic engaged to provide breakdown or accident assistance about the condition of the vehicle, which may facilitate a faster, more targeted repair. This Service also enables error codes to be cleared remotely by the CAC in the event of a breakdown or, if the vehicle is in a workshop, by the Service Partner

7. **Intentionally deleted**

8. **Remote Retrieval of Vehicle Status/Remote Status**

This Service allows the Customer to view online the vehicle operating data (such as fuel level, mileage, average fuel consumption, tire pressure, maintenance interval, charge level of the high-voltage battery, electric range) using certain User Gateways, providing the Customer with information on the condition of the vehicle. Additionally, the Customer has the option of defining certain events that will, when such events occur, trigger the sending of an automatic message to the Customer via the notification channel set up in the User Account (for instance, when a vehicle's high-voltage battery is fully charged).

9. **Intentionally deleted**

10. **Programming Charging Settings, Pre-Entry Climate Control**

If a Customer uses a vehicle powered by an electric battery, the Customer may use the “**Programming of Charging Settings and Pre-Entry Climate Control**” Service to charge the vehicle remotely. This includes, for example, setting the charging mode, displaying status data, or scheduling the next time the vehicle is to be used. The Customer may also define certain events that trigger an automatic message to be sent to the Customer via the notification channel set up in the User Account (for instance, when the vehicle's high-voltage battery is fully charged). This Service also enables the Customer to operate the vehicle's

advance climate control via certain User Gateways.

11. Remote Door Locking and Unlocking

This Service allows the Customer to check via certain User Gateways whether the Customer's vehicle's doors and trunk are locked or unlocked and – depending on the vehicle version – to lock and unlock them remotely.

12. Intentionally deleted.

13. Intentionally deleted.

14. Personalization

This Service allows the Customer to create profiles (e.g. favourites settings, station settings, vehicles settings, settings relating to the instrument panel display), and save and edit them using a name they have specified. This Service allows the profiles to be transferred between the vehicle and the Backend, and to be retrieved via certain User Gateways of the Customer.

15. Parked Vehicle Locator

This Service allows Customer to use certain User Gateways to display a map on which the location of the Customer's parked vehicle is shown. For data protection reasons, the Customer is only able to display the location of the vehicle if the vehicle is within approximately 1.5 km or 1 mile of the Customer's location.

16. Vehicle Tracker

This Service allows the Customer to use certain User Gateways to determine the current location of his or her vehicle.

17. Route Planning

17.1 This Service allows the Customer driving a vehicle with a battery electric drive to plan a trip or route via certain User Gateways.

17.2 In addition, the Customer can use this Service via certain User Gateways to search for charging stations for a battery electric vehicle and have these locations displayed on a map or in list form, to query information on charging stations, and to filter the charging stations. The Customer can also enter this information into the infotainment system as a destination address. The driving range of the vehicle is calculated and displayed via certain User Gateways.

17.3 The "Last Mile Navigation" function allows the Customer to use the location of the parked vehicle and, if applicable, the updated end-of-trip destination entered on the vehicle's infotainment system in order to guide himself on a compatible end-user device from the

parked vehicle to the destination address, provided that the Customer's vehicle and compatible end-user device has a suitable Bluetooth-based communication connection.

17.4 The "Trip Statistics" function allows the Customer to see various statistics related to a journey (e.g. average speed, distance travelled and time spent in the vehicle). To use Trip Statistics, the Customer must first have activated the "Remote Retrieval of Vehicle Status" Service.

17.5 Intentionally deleted.

18. Geofencing

This Service allows the Customer to use certain User Gateways to determine whether and where his or her vehicle exits or enters one or more areas defined by him or her.

19. Concierge Service

19.1 This Service allows the Customer to obtain from a concierge certain information about various topics that interest the Customer (e.g., route and traffic information or information on points of interest, general knowledge, weather, sporting events, cultural events, stock market prices and events, hotels, restaurants and bars or travel) or information that the Customer needs in emergency situations (e.g., information regarding the next closest medical facility). As a part of the Concierge Service, the Customer may also receive information about third party offers.

19.2 The Customer may also use a concierge to arrange bookings or orders which require corresponding payments and may have certain restrictions with respect to local availability. For Concierge Services for which payment is required, the Customer must provide the concierge with the Customer's credit card details and correctly answer a security question. The credit card details are used solely to render the desired services and are not stored. The Customer determines the security question and answer in the Customer Portal.

20. Intentionally deleted

21. Live Traffic Information

This Service allows the Customer to receive live traffic updates through a mobile data connection in the vehicle.

22. Car-to-X Communication

This Service allows the exchange between vehicles of updated traffic information regarding potentially hazardous situations (e.g., broken-down vehicles, accidents, vehicles with switched on warning light, heavy rain, fog and slick road surfaces) for which this Service has been activated using the Backend.

23. **Internet Radio**

This Service allows the Customer to use certain Internet radio services in the vehicle. Depending on the infotainment system of the Customer's vehicle, the Customer may need to first establish a mobile data connection for the streaming of Internet Radio via the compatible end-user device or to purchase a certain data volume via the Customer Portal in order to use this Service.

24. **Parking**

This Service allows car park locations, together with the number of currently unoccupied parking bays, to be displayed via User Gateways specified by the Customer. The Customer can copy these locations into the infotainment system as target addresses or send them from the App to the infotainment system and copy them there as target addresses.

Additional information about parking garages and street parking spaces (e.g. address, number of spaces occupied, opening times, prices, height, width, availability calculated from historical data, parking times) can be displayed via specified User Gateway.

25. **Fuel Station Prices**

This Service allows the Customer to display the location of fuel stations within a certain radius of the current vehicle position or in a selected map section in the infotainment system of the Customer's vehicle. The price of fuel associated with the displayed filling stations is also provided.

26. **Online Map Update**

This Service allows the Customer to regularly update and keep current the navigation map data in the infotainment system of the Customer's vehicle.

27. **e-Navigator/Charging Stations**

This Service allows the Customer to display the location of charging stations and the number of available charging stations in the infotainment system of the Customer's vehicle. The Customer can also enter this information into the infotainment system as a destination address. Moreover, the electric range (driving distance) of the Customer's vehicle is also calculated and displayed in the infotainment system of the Customer's vehicle.

28. **Local Search**

28.1 This Service allows the Customer to search, by means of an online free text search, for addresses and points of interest (e.g., restaurants, cafés, bars, hotels, businesses, shopping) within a certain radius of the current

vehicle position. If the Customer has entered a destination address in the Customer's vehicle infotainment system and the navigation system is activated, the Customer can also search for points of interest within a certain radius along the selected route or also within a certain radius of another address. The search results can be displayed in the infotainment system of the Customer's vehicle and can also be entered in the infotainment system as a destination address. .

28.2 The **"POI Download"** function allows the Customer to search for addresses and points of interest (e.g. restaurants, coffee shops, bars, hotels, retail outlets, shopping opportunities, etc.) on a variety of online navigation maps offered by certain Third Party Content Providers and to use the Mercedes me App to send the results to their vehicle's infotainment system and to transfer them into the infotainment system as destination addresses.

29. **Weather**

This Service allows the Customer to display weather information within a selected map section in the infotainment system of the Customer's vehicle.

30. **Predictive Navigation**

This Service allows the Customer to receive suggestions for destination addresses based on a probability model. This model uses information such as the GPS position of the starting location and destination, the weekday, and the times of previous trips during which the Service was active. A requirement for using this Service is that the Customer has activated the **"Tracking Service/Vehicle Monitoring"** Service and that there is a Bluetooth® connection between the Customer's vehicle and the Customer's compatible end-user device.

31. **Intentionally deleted**

32. **Mercedes-Benz Apps**

32.1 Internet Radio

This Service allows the Customer to use certain Internet radio services in the vehicle. Depending on the infotainment system in the Customer's vehicle, the Customer may require a mobile data connection for the streaming of music or other audio output via his or her compatible end-user device, or to purchase a certain data volume via the Customer Portal.

32.2 Intentionally deleted

32.3 Weather

This Service allows the Customer to display the weather forecast within a selected map section in the infotainment system of the Customer's vehicle.

32.4 e-Navigator

- This Service allows the Customer to display the location of charging stations and the number of available charging stations in the infotainment system of the Customer's vehicle. The Customer can also enter this information into the infotainment system as a destination address. Moreover, the electric range (driving distance) of the Customer's vehicle is also calculated and displayed in the infotainment system of the Customer's vehicle.
- 32.5 **Intentionally deleted**
 33. **Intentionally deleted**
 34. **Intentionally deleted**
 35. **Intentionally deleted.**
 36. **Intentionally deleted**
 37. **Intentionally deleted**
 38. **Theft Notification with Parked Collision Detection**

Through this Service, the Customer receives a notification on their compatible end-user device via the Mercedes me App if the parked vehicle detects a sufficiently forceful impact. Not all impacts are detected, particularly those of a minor nature. If triggered, the notification includes information detected about the intensity of the impact, the affected area, and the time of the incident. In addition, for newer vehicle models (see Overview of Services) the Customer is informed of the detected impact on the infotainment system when the vehicle is started. The Service also sends a message *via* the Mercedes me App if the anti-theft alarm system is activated, and includes the source of the alarm activation. The Customer has the option of temporarily switching off the alarm, the tow-away protection, and the interior protection in his or her vehicle *via* the App. The next time the vehicle is turned on, the sensors that had been switched off in this manner are automatically switched back on in order to protect the vehicle.
 39. **Interface to Third-Party Service Providers**

This Service allows the Customer to share data (for instance, vehicle data, which may include personal information) with Third Party Service Providers provided by MB Canada and selected by the Customer.

Where made available by MB Canada, the Customer may also allow the Third Party Service Provider to modify data held by MB Canada, or enable the Third Party Service Provider to send commands to MB Canada that are transmitted to the vehicle. Depending on the Third-Party Service Provider selected, MB Canada may use a subsidiary of MBAG to perform the Service.
 40. **Intentionally deleted.**
 41. **Connection to Third Party Content Providers**

This Service allows the Customer to retrieve information from the vehicle via an interface to Third Party Content Providers (e.g. Yelp and TripAdvisor are current Content Providers). The information retrieved in this manner comes exclusively from the Third Party Content Providers.
 42. **LINGUATRONIC Voice Control System**

This Service allows the Customer or other occupant of the vehicle to operate various functions in the vehicle and to request information from MB Canada or Third Party Content Providers by means of voice input. Any voice control system that may be embedded within the vehicle is supplemented by voice recognition processing that occurs in the Backend.

Certain topic areas require the activation of additional Services. For example, in order to use the topic area "**In-Car Office**", the Customer must have activated the "**In-Car Office**" Service. For certain topic areas, such as messaging, the online LINGUATRONIC Voice Control System Online Service requires an active Bluetooth connection between the compatible end user device and the vehicle.
 43. **Global Search**

This Service allows the Customer to use a central search service to receive (via the Backend) information about vehicle functions and other Mercedes me connect Services, information from MBAG, and information from Third Party Content Providers.
 44. **Intentionally deleted**
 45. **Intentionally deleted**
 46. **Valet Protect and Curfew Minder**

This Service allows the Customer to define an area using his or her compatible end-user device via certain User Gateways. When the Customer's vehicle leaves the pre-defined area, the Customer will receive an automatic push notification to his or her compatible end-user device. In addition, the Customer can use push notifications to be alerted when the vehicle ignition is activated or deactivated.
 47. **Speed Alert**

This Service allows the Customer to select a speed via certain User Gateways, and to

receive a notification in the Customer Portal when the selected speed is exceeded.

48. **ENERGIZING Coach**

This Service allows the Customer to receive recommendations for ENERGIZING comfort programs. The suggestions are based either on data generated in the vehicle (e.g., duration of journey) or on data from compatible third party wearable devices (e.g., stress levels or sleep data), provided that the Customer has linked his or her compatible third party wearable device to the Mercedes me App via Bluetooth.

49. **EQC Optimized Navigation**

This Service allows the Customer to view the dynamic display of optimised routes to set navigation destination set by the Customer, taking into consideration the available charging stations and the remaining range of the vehicle, and calculating charging stops.

50. **Display Charging Stations**

This Service allows the Customer to display the location of charging stations and the number of free charging stations in the infotainment system of the Customer's vehicle. The Customer can also enter this information into the infotainment system as a destination address.

51. **Mercedes me Charge**

This Service allows the Customer to charge his or her vehicle using the technical interface made available by selected third-party mobility service providers (e.g. Chargepoint) ("**Mobility Service Provider**"), having regard to the vehicle specification and within the scope of further Services. In order to use this Service, the Customer must first activate "**Display Charging Stations**" Service. The Mobility Service Provider enables the Customer to authorize him or herself via third-party charging station providers ("**Charging Station Providers**") at the charging stations the Customer has selected via certain User Gateways and to charge his or her vehicle for a fee. The Customer must first register with the Mobility Service Provider via a link in the Customer's User Account and provide their payment data to enable payment.

52. **Remote Engine Start (for pre-entry climate control)**

This Service allows the customer to turn the vehicle engine on and off remotely via certain User Gateways. This allows the Customer to heat his or her vehicle and to charge the vehicle

battery. The vehicle runs for a maximum of ten minutes after an engine start.

53. **Stolen Vehicle Location Assistance**

This Service enables the Customer to support law enforcement agencies in their efforts to locate the Customer's stolen vehicle by providing certain data via the CAC or a certified downstream provider.

The MB Parties may require the Customer or third parties to provide additional information prior to providing the requested services. For example, the MB Parties may require the Customer to provide satisfactory identification information or law enforcement to confirm that a vehicle may have been stolen or involved in an unlawful act prior to providing the Stolen Vehicle Location Assistance Service. MB Canada reserves the right to suspend or modify such requirements where reasonable, as determined in MB Canada's sole discretion.

The MB Parties will use reasonable efforts to attempt to locate a Customer's vehicle, however, the MB Parties may cease attempting to locate the Customer's vehicle after having been unsuccessful in doing so for a reasonable period of time, as determined within the sole discretion of MB Canada.

The MB Parties assume no liability for the Customer's use of Stolen Vehicle Location Assistance Service when the Service become available, in particular in circumstances where the Customer elects to investigate his or her stolen vehicle without the assistance of law enforcement agencies. The Customer is independently responsible for Customer's use of the information and any decisions made on the basis of the information.

The data services for certain Services and functions in these Terms of Use are based on a technical application and data of Third Party Service Providers. The (licence) terms of the Third-Party Providers can be found under:

<https://legal.here.com/terms/serviceterms/>

<https://legal.connectedrad.io/tandc/daimler>

<https://opendatacommons.org/licenses/odbl/1-0/> (OpenStreetMap-Datenbank)

The voice control function of certain Services and functions in these Terms of Use is based on a technical application of a Third Party Service Provider. To use the voice-control function, the Customer must accept the Third Party Service Provider's terms of use.

Annex 1 – Terms and Conditions of the Third Party Service Provider

Other Notices for the Mercedes me connect Services

1. Preamble

Mercedes-Benz Canada Inc. ("MB Canada") observes high standards of quality and product safety in its products. For this it has developed appropriate measures and security precautions for each of its offered Services, among other things. This however does not release the Customer from personal responsibility for safe vehicle operation and compliance with applicable laws, especially in the view of the fact that accident events in road traffic are frequently caused by excessive visual distractions from information, communication, and entertainment media and devices.

2. General Notices

- 2.1. Customers who choose to operate and use integrated information systems and communication devices in the vehicle can become distracted and may lose control of their vehicle. Therefore, the Customer uses these systems and devices at the Customer's own risk and discretion. If use of the Services impedes safe operation of the vehicle, or would otherwise violate traffic laws, the Customer should not use the Services. The MB Parties assume no obligations or liability relating to the Customer's use of the Services while operating the vehicle.
- 2.2. The Customer is at all times responsible for the Customer's own actions. Moreover, these Services do not relieve the Customer from any responsibility and accountability for ensuring the driving capability and road safety of the vehicle. MB Canada does not assume any liability for any failure of the Customer to undertake necessary maintenance and repair work.
- 2.3. The laws of the applicable jurisdiction must be observed by the Customer or authorized Co-User at all times. The Customer should be aware of any laws applicable to the use of cell phones, smart phones or other mobile electronic devices in the applicable jurisdiction. There is a risk of accident and injury for unsupervised children and animals in the vehicle.
- 2.4. To the extent possible, voice control actions and/or read-aloud functions should be used by Customer while operating the vehicle. That a Service or feature of a Service is available to Customer while Customer is operating the vehicle does not mean that use of such Service or Feature is recommended or authorized by MB Canada for use while operating the vehicle. False notifications, misinterpretations, transmission errors, etc. cannot be ruled out. Therefore, the use of voice assistance functions does not obviate the need to ascertain the actual conditions. In addition, please observe the individual (warning) messages.
- 2.5. MB Canada expressly refers to the operating instructions and all warnings provided with the Services, which must be observed by the Customer.
- 2.6. The MB Parties shall not be liable for any damages arising from false or incorrect messages, disturbances or loss of a connection to the server due to force majeure, technical conditions or other reasons beyond the reasonable control of MB Canada
- 2.7. Status queries in the vehicle through geofencing features may not be reliable despite the available standard of technology. Under certain circumstances, it may not be possible to transmit data in full or in part (e.g. in parking garage). As a result of this, it is possible that stored commands are not activated because a vehicle status is not received by the Backend correctly or in a timely manner. The Customer is responsible for use of status queries and reliance on any information provided thereby.
- 2.8. The Customer undertakes to inform any vehicle users of this activation of the Beginner Driver service before the start of vehicle use, including that the vehicle speed and acceleration are reduced when Beginner Driving mode is activated.

3. Involvement of Third-Party Service Providers/Content Providers

- 3.1. MB Canada does not have control over, and to the fullest extent permitted by applicable law, assumes no responsibility for, the content, privacy policies, or practices of any Third Party Service Provider.
- 3.2. MB Canada does not make any guarantees relating to the content, correctness, topicality, completeness and availability of any information made available through the Services from any Third Party Content Provider. Furthermore, the MB Parties do not assume any obligation to monitor, report on, update, complete, correct, or ensure the availability of any information nor do they assume any liability relating to the correctness, topicality, availability, or quality of the information. MB Canada has no influence on the operation or functionality of the corresponding technical applications of the Third Party Service Providers or Third Party Content Providers. The Third Party Service Providers or Third Party Content Providers may change or discontinue the functionality or individual functions of their services. Some of the functions of the Third Party Service Providers or Third Party Content Providers may not be available everywhere. Therefore, the Customer uses the information at Customer's own risk and discretion and is responsible for any use of the information and any decisions made on the basis of the information.
- 3.3. MB Canada does not guarantee the functionality of any commands made in connection with the Services. Such commands may not be properly executed or may be delayed.

- 3.4. The MB Parties assume no liability with respect to Customer accounts with Third Party Content Providers that may be linked to the Services by the Customer. These links are the sole responsibility of the Customer. Certain additional terms and conditions may apply with respect to use of the services or content provided by Third Party Content Providers, and Customer's use of such services is deemed to constitute its acceptance of any such additional terms and conditions.
- 3.5. In the event the Customer becomes aware of a suspected security issue, or suspects the loss or unauthorized disclosure of his or her access credentials by the Third Party Service Provider, the Customer must immediately terminate the permissions he or she has provided to the Third Party Service Provider via the Customer Portal.

4. Third Party Equipment

- 4.1. The Customer is responsible for any equipment not provided by MB Canada used in connection with the Services. The MB Parties shall not be liable for any damages arising from the Customer's use of third party equipment in connection with the Services.
- 4.2. MB Canada may, in its sole discretion, limit or deactivate a Service where it reasonably believes such restrictions are warranted (for instance, in the event there is a suspected security issue with the Third Party Service Provider, an incompatibility with the Third Party Service Provider, or a change of cost). MB Canada may, in its sole discretion and without notice to the Customer, change the selection of available Third Party Service Providers, the available data categories, and the available commands.
- 4.3. Data displayed with respect to charging progress and charging status may vary from the actual status and the information displayed could be, either in whole or in part, incomplete, incorrect or not current.
- 4.4. The Customer must ensure that devices and objects in the vehicle are stored and secured in a manner that would prevent injury of any vehicle passengers in the event of a sudden acceleration/deceleration or collision. The Customer is responsible for any devices or other objects in the vehicle. The MB Parties assume no liability for any damages that arise from the presence of a device or other object in the vehicle in connection with Customer's use of the Services.

5. Special Notices for Individual Services

5.1. Live Traffic Information and Car-to-X Communication

Relevant traffic information or potentially hazardous situations may not be collected and reported through Live Traffic Information and Car-to-X-Communication. The information available through the Services is generated by other Customers or drivers and a Third Party Content Provider, and the information could be, either in whole or in part, incomplete, incorrect or not current. The MB Parties assume no responsibility for checking whether the information is complete, accurate or current, or for completing, correcting or updating such information, or for making sure that the information is available or is made available in a certain quality. The Customer is independently responsible for Customer's use of the information and any decisions made on the basis of the information; accordingly, the Customer is responsible for checking whether the information is complete, accurate or current and is available or is made available in a quality suitable for the Customer's purposes.

5.2. Remote Locking and Unlocking of Doors

The unattended remote opening of the vehicle may increase the risk of theft of the vehicle and of items located inside the vehicle. The MB Parties assume no obligations or liability for theft of any vehicle or other item under any circumstances. The Customer uses this Service at Customer's own risk and discretion. The MB Parties accept no liability for any damages or claims that arise from the Customer's actions of locking and unlocking of the vehicle, and the Customer shall indemnify and hold MB Canada harmless from any third party claims arising from such actions.

5.3. Available Parking Spaces

The Service shows only available parking spaces, however the information provided may, at any time, be inaccurate, incomplete, or not up to date. The MB Parties assume no obligation to correct, complete, or update any information provided. The Customer is responsible for the safe operation of the vehicle and for observing all local conditions (e.g. vehicle height in the parking garage, posted notices prohibiting parking). In addition, the Customer acknowledges and agrees that the MB Parties shall not be responsible or liable for any loss or damage whatsoever arising from any inability or unsuitability of parking or losses to vehicles or the contents of the same resulting from fire, theft, collision or any other cause arising from the Unoccupied Available Parking Spaces Service.

5.4. Intentionally deleted

5.5. Intentionally deleted

5.6. Intentionally deleted

5.7. Intentionally deleted

5.8. Intentionally deleted

5.9. Remote Engine Start

Before the Customer activates the Remote Engine Start he or she should ensure - among other things - that the vehicle is not in a closed space without adequate ventilation, that the exhaust pipe is free of obstruction, that the vehicle cannot come in contact with flammable materials and that it does not show any significant damage.

5.10 Stolen Vehicle Location Assistance

The Customer uses this Service at the Customer's own risk and discretion. The MB Parties assume no obligation or liability relating to the Customer's or any third party's use of the data provided by this Service.

5.11 ENERGIZING Coach

Heart rate is only displayed on the media display if it falls within a range of 30-140 bpm. Heart rate figures have no medical value and are provided for information only. No claim is made as to their accuracy.

Mercedes me connect Overview of Services ¹⁾	Use possible with Mercedes me user account via the Mercedes me portal	Use possible with Mercedes me user account via the Mercedes me app	Use possible via infotainment system in vehicle	Terms	Optional extras required (OE codes)	Availability for the following model series from date of production
	Availability for use					
<u>Assist Services</u>					Available in all model series with Audio 20, COMAND or MBUX	
1) Maintenance Management ¹⁾	<input type="checkbox"/>			From activation ^{5) 6)}		Transmission Mode 2: Available on all 2019 and newer Mercedes-Benz passenger vehicles (excluding B-Class)
2) Telediagnosics ¹⁾	<input type="checkbox"/>	<input type="checkbox"/>			COMAND Online (531), Audio 20 (506, 505, 520, 522) or MBUX multimedia system (545)	Available on all 2019 and newer Mercedes-Benz passenger vehicles (excluding B-Class)
2.1) Battery Observer	<input type="checkbox"/>	<input type="checkbox"/>				Available on all 2019 and newer Mercedes-Benz passenger vehicles (excluding B-Class)

☐ = Services can be used via this technical device.

1) Available for use by main and co-users.

2) The Services are available only for electric and plug-in vehicles.

3) In the case of the designated model series, the Services require a data allowance from a separate mobile-phone contract from a telecommunications service provider, which can be purchased via the customer portal.

4) Activation is possible within 1 year after the initial registration or start of operation (whichever comes first).

5) Activation is by creating a Mercedes me User Account, accepting the Terms of Use and pairing the vehicle.

6) Mercedes-Benz Canada Inc. reserves the right to change or discontinue Mercedes me connect Services at any time without prior notification or incurring any future obligation. For example, technologies can and do change over time so current technologies used by Mercedes me connect may become obsolete or be replaced by other, different technologies, including different cellular or WiFi signals, which may render Mercedes me connect inoperable with your vehicle. Mercedes-Benz Canada Inc. will not be responsible for purchasing for your vehicle and/or cellular device, or updating them, with new technologies that might in the future be required to restore operation of Mercedes me connect with your vehicle.
